Western Pacific Skirts Several Camps of Deep Creek Country.

pected here soon to start work on several groups of claims owned by Duncan MacVichie, H. H. Green and others. Mr. MacVichie was highly pleased with

the mineral showing and predicted a great future for the district.

Parties are negotiating for the Gold Hill properties in this district, and, if successful, will develop the ground and open up one of the higgest prices in the open up one of the biggest mines in the state of Utah.

state of Utah.

There is not much work going on at present, but the owners of mining ground are preparing to do lots of work this year. There is a small force working at the Lucy L, and are extracting some very good gold-bearing rock. General Manager Frank L. Wilson is expected here to look over the mine and inspect the work that has been done during the past six months.

FLYING DUTCHMAN MINE.

Ericson District Property Has Large Body of \$48 Ore.

Eureka, Utah. May 7.-Judge Thoma Burns accompanied by Herman Hoesch, Albert and Jake Ekker came in last night from the Ericson mining district. Tooele country. Burns states that the reports of the Staffenberg property are greatly exaggerated, but he is enthusiastic in his praises of the Flying Dutchman, which he says is one of the best looking prospects in the district. About the 15th of April last, Tim

on April 30, having been appointed general superintendent of the proposi-tion and, having invested heavily in the shares of the company himself, it is very evident that he has every Mr. Burns said that a shaft has been

Mr. Burns said that a shaft has been sunk on the property about 175 feet deep on the trend of the vein, which is at the angle of 50 per cent, dipping west, and every foot has been through ore, which has averaged about \$48.

It is the intention of the company to put in a roaster, and put the ore on the market at a cost to them of \$2 per ton, the system selected being the Madder.

Samples from the property are shown here in Eureka and old timers say that they compare favorably with

well in gold and silver.
This little camp, Sheeprock by name, s well worth watching. It has not been boomed by wild-eyed visionaries, but good honest and earnest work has been done and some day it will sur-prise the knowing ones in the mining world, who have systematically "Knocked" the Ericson district.

Provo, May 6.—Returns have been received from the first car of ore shipped from the Buckley mine. In Rock canyon, and while the value did not quite come up to the expectations of the company, the results are quite satisfactory for a starter.

The controls show 23.3 per cent lead, 4.5 ounces of silver, 26 per cent iron and a very small amount of gold. The shipment will bring a net return, after all working, transportation and smelting charges are supported by the smelting charges are shipped as a say of discovers, details regarding the finds, and official reports from assayers are lacking, so that a reliable account cannot be furnished at this time.

As the result of another rumor a large number of prospectors left this week for the mountains about fifteen miles east of Las Vegas. A story leaked out that good values were being located there and a stamped in that direction was the result of another rumor a large number of prospectors left this week for the mountains about fifteen miles east of Las Vegas. slying the necessary water could be overcome without the expenditure of any great amount of money.

Superintendent Doty of the Bullion Beck states that important developments have been taking place recently on the 1400-level of the mine and that the old bonanza is showing up exceptionally well just now. The company is doing considerable work in the extreme northern and southern territory on both the 500 and 700 levels and while the ore now being sent out is being mined by the small army of leasers. Mr. Doty's force is doing work which will be productive of good results in the future. The company's pay roll and the money which is being paid out to the leasers will amount to something over \$5,000 monthly.

The Godiva mine is now showing up spendidly and the new ore body on the 500-level has been cut for a distance of thirty-six feet without encountering the wall. Superintendent Jackson McChrystal wightly pleased with the showing on the

About the 15th of April last, Tim Marrion, who was formerly manager of the Bachelor mine of Ouray, Colo., inspected the Flying Dutchman claims in the interests of the Colorado investors, who are located in Grand Junction, and on his return he gave such a glowing account of the property, that those who had faith in Tim Marrion's opinion put heir money into the proposition.

Mr. Marrion returned to the claims on April 30, having been appointed general superintendent of the proposi-

mountain.

We publish this week a list of the larger mines of Eureka together with the mount of money checked out by each. The figures are nearly correct, but do not include wages paid out to miners who are employed by leasers. Below are the ligures which tell the story:

Clifton, Deep Creek, May 5.—Now that the Western Pacific railway is going to be built, it has put new life into the prospectors and mine owners of the Deep Creek country. The Western Pacific will pass directly through the northwestern part of what is commonverted the desert into fields of alfalfa

Deep Creek country. The Western Pacific will pass directly through the northwestern part of what is commonly known as the Deep Creek mining region. It cuts close to Silver Islet, Morgan, Ferguson, Dolly Varden, White Horse and Kingsley mountains, all of which contain valuable ledges of gold, silver, copper, lead and iron.

At Silver Islet considerable work is being done. The Carrie Mack Mining company owns a group of seven claims on what is called the mother lode. The shaft has attained a depth of sixty feet and at the bottom there is five feet of silver-lead ore, carrying as high as 60 per cent lead, 272 ounces silver and some copper. The McKellar Irothers of Tooele, with S. W. Levy, W. F. Snyder and others, own the contain valuable feet of silver-lead ore, carrying as high as 60 per cent lead, 272 ounces silver and some copper. The McKellar Irothers of Tooele, with S. W. Levy, W. F. Snyder and others, own the contain valuable feet of silver lead or carrying as high as 60 per cent lead, 272 ounces silver and some copper. The McKellar Irothers of Tooele, with S. W. Levy, W. F. Snyder and others, own the contained by Mr. Bradburn says in drifting for this vein they encountered in the tunnel, which has been encountered in the tunnel, which is being run on the Signal Peak property on Gold Mountain. A large streak for running ore has been struck, which has compeled the company to put on three shifts to hold the running rock in check.

The report of a strike in the Bradburn himself. All mining men who have lead to the mother load. The same feel the tunnel, which has been concurred in the tunnel, which has been encountered in the tunnel, which has been struck, which has compeled the company to put on three shifts to hold the running rock in check.

The report of a strike in the Bradburn himself. All mining men who have go, and according to H. G. McMahon and J. N. McLeod who have just result to the properties of the company to put on the tunnel, which has compeled to persuade him to return to beauty of the manuel of t silver and some copper. The McKellar irothers of Tooele, with S. W. Levy, W. F. Snyder and others, own the controlling interest.

Dr. F. M. Davis, C. E. Green and associates own a group of four claims adjoining the Carrie Mack. They have sunk a shaft forty feet and have a six foot vein carrying well in silver and lead. They have just passed through Cliffton on their way to Silver Islet with a load of supplies and intend to push work ahead for the next six months.

Then there is the "Micklejohn and Electric groups, where more or less work is being done, and the district is bound to make a name in the mining world. The ore lays in a contact between porphyry and lime.

Messrs, W. F. Snyder, Emil I. Raddatz, superintendent of the Honering world. The ore lays in a contact between porphyry and lime.

PRICELESS JEWELS.

Belong to the Rajahs of India and Are the Envy of the World.

Some things there are in this world the potential American dollar cannot buy and which even the influence of European royalty is powerless to win. Among them are the priceless sets of jewels belonging to the rajahs of India. Many of these princes of the east have sets of gems which represent a value unheard of outside the orient and beside which the most famous collections of the crowned heads of Europe or of the families of our American millionaires sink into insignificance.

heads of Europe or of the families of our American millionaires sink into insignificance.

It is not likely that a white man will ever wear these treasures unless they come to him as the spoils of war. It is against the most seared traditions of the rajahs to part with their family heirlooms. Fabulous prices have been offered them for single jewels or ornaments out of their vast supplies. But gold has no power to tempt them where their jewels are concerned.

The pearls and diamonds belonging to the Rajah of Dholpur rank first among all these costly collections. They form the most valuable set of jewels in existence. One million dollars was offered to the rajah for the single string of large pearls about his neck. The offer was refused. Each of these pearls is said to be absolutely without flaw, of perfect purity and luster.

Every jewel in the twelve great ropes of pearls hanging down from the neck is worth a small fortune in itself. Those in the four ropes across the left shoulder, though small in comparison with their companions, are really of good size and great value. Diamonds are interspersed

mate the total value of this wonderful meirloom of the rajahs of Dholpur. It is priceless.

Far less showy, but scarcely inferior in value, is the family inheritance of the rajah of Gwallor. His is a wealth of rajah of Gwallor. His is a wealth of emeralds. The three bands of immense stones which interspersed with numerous smailer ones, form a broad collar over the chest and shoulders are native cut. Nor will their owner consider the suggestion that they be recut with modern skill and methods. What they might gain in brilliancy by the operation would be more than offset, in his mind, by what they would lose in size. The value of each of the large stones is about \$50,000.

The strips of gold embroidery upon the robes of this Indian prince are set with many emeralds of a smaller size. The epaulets, which hang from the shoulders down over the arms, are incrusted with extraordinarily large stones surrounded with pearls.

The collar—or one might almost call it cape—worn by the rajah of Baroda is a mass of diamonds and various precious stones, combined in rich and wonderful confusion. The color and brillianty of this ornament can better be imagined than described. The lighter stones are set off by borders of the darker emeralds, those forming a fringe around the lower edge being of immense size and value, Scarcely less beautiful is the tassel of pearls which hangs from the left side of this rapah's turban. Each string in this tassel represents a fortune. In each the pearls have been carefully graded as to size and each is tipped with a pompon of silk. The cap of iewels which covers the rajah's silk turban is a mass of various gems to match his collar. The edge is formed of diamond pendants.

lar. The edge is formed of diamond pendants.

Five great ropes of pearls, priceless in value, constitute the chief treasure of the rajah of Nizam. A single pearl from these might well make its owner an objectof envy. Among the pearls, here and there, are strung other gems, the better to display their beauty. After his pearls the rajah prizes most the nine large diamonds which hang from his gold coronet. That in the center particularly is of great size and beauty.

Particularly odd and effective is the use to which the rajah of Punnah has put the thousands of pearls gathered by generations of his ancestors. He has used them to embroider his robes of state. Over the shoulders down the sleeves and around the edges of the robe the pearls have been woven with silk and gold into beautiful and intricate designs.

IN MEMORIAM

Salt Lake Aerie Holds Services in Unity Hall For Departed Ones.

ADDRESS BY REV. F. F. EDDY

memorial services yesterday morning ing. at Unity hall for their fellow lodgemen who have passed away since the founding of the lodge in July, 1900. Rev.

society, and a member of the aerie, made the principal address. The programme included musical selections by the Utah State band and by the Unity quartette. Miss Emily Larsen sang a soprano solo, "O Dry Those Tears."

The Eagles met at their headquarters in A. O. U. W. hall about 10:30 o'clock, under the leadership of Worthy President G. A. Whitaker. From here, headed by the State band, they marched to Unity hall, 140 Second East street. The programme began at 11 a. m. Following the services a committee visited the aves of the dead members and decorated them. This committee consisted of W. H. Luddington, Albert Hertz. Frederick Clifford, H. C. Wade, M. Don, J. L. Johnson and C. A. Mills.

The departed Eagles for whom yesterday's ceremonies were held are John Golding, C. S. Green, L. A. Gray, W. A. Wilson, W. E. Miller, C. D. Coffey, A. S. Watson and T. T. Huddart.

Rev. F. F. Eddy's Address.

appointed seasons rites and ceremonies are performed for the sake of the happiness and well-being of the departed.

It was a delicate and timely act, and the members of the Salvation Army thereby endeared themselves more to The conception of our memorial services here in America differs radically from this, as relating to the memorial exercises we hold as a nation in honor of our dead heroes, and such as those we are holding today as an order. For our own spiritual satisfaction we de-sire to honor the memory of our dead. But more than that, we desire to express loyalty to the issues for which our heroes fought, or the principles upon which our fraternal orders are founded.

founded...

"We call this a memorial service, and it is entirely commendable that we should meet together for communion and for the reinvigoration of our purposes. But if our service ends here, it is of little value. It is like the brand of religion that is only in evi-

dence on the Sabbath and prayer meeting night. A genuine memorial can only be that daily service to the principles we so proudly inscribe over the various stations in our lodge room— Truth, Liberty, Justice and Equality. These are words that fall glibly from the tongue, but to coin them into ac-tion, that requires the constant and watchful efforts of a lifetime."

Mr. Eddy then dwelt on the thought that the memories of earth are fleeting and perishable. Yet a deep instinctive yearning of humanity is for some importal property. mortal expression or achievement. For this yearning men have found two so-lutions that in some measure satisfy their minds. One of these is a belief in continued existence after death; the other is a conviction that the universe is ordered in a moral way, that truth or righteousness is eternal, that we can NOON AT CEMETERY.

Is ordered in a moral way, that truth or righteousness is eternal, that we can work on the side of eternal things. These two thoughts coincide and prepare each for the other. We must get some power in righteousness, must feel that we are doing something to establish the eternal verities in the present life in order to gain any real assurance of a future existence worth have

When the Armies Meet.

A feature in connection with th

Hev. F. F. Eddy's Address.

During the course of his address yesterday on "Men and Memories," Rev. Mr. Eddy said:

"In many forms of primitive religion and in the ancient and elaborate Shintoism of Chira and Japan, at certain appointed seasons rites and ceremonies are performed for the sake of the happiness and well-being applies and well-being the sake of the happiness and the sake of the sake of the happiness and the sake of the sake of the sake of the approaching column.

Just west of the approaching column, the northern side of the street, the salvationists, men, women and children, wheeled into "company front, the standard bearers dipped the colors and each man of the group uncovered and remained at attention while the sake of the happiness and well-being the sake of the sak
